

enjoy your Acrygel

PROFESSIONAL FORMULA

The best of gel
and acrylic
in one product

RobyNails

The new one phase hybrid **professional gel!**

One phase hybrid gel which combines acrylic and gel characteristics. Unlike acrylic it does not require a monomer. Like gel it cures in UV/LED lamp. Harder than gel, more flexible than acrylic. The high viscosity allows a very precise application: it doesn't move and it doesn't dry during application. Odorless, resistant and light, soft to file, ensures the best durability results also on extreme lengths.

Ideal for natural nails, nhancement with Tip, Form and Tip Dual Form

Highly resistant

Light and soft to file

Ideal for all types of nails

Packed in jar for use of the product without waste

Is applied like acrylic but it cures in UV/LED lamp

Odorless, no need of monomer

Fast and easy to use

Can be applied on all nails together

Hybrid Formula:
ideal also for extremely long nails

Acrygel

Products

ACRYGEL CLEAR

One phase hybrid gel with cover nude color for camouflage effect, perfect also in combination with Acrygel White.
30 ml code 13513

Instructions Acrygel

APPLICATION ON NATURAL NAILS

- 1 Prepare the nail.
- 2 Apply Adhesion Promoter.
- 3 Apply Bonder Plus.
- 4 Using the Spatula pick Acrygel and apply it over the nail moistening it with Acrygel Solution.
- 5 Place in UV/LED Lamp for 1/2 minutes.
- 6 Using a Lint Free Wipe clean the nail with Magic Cleanser.
- 7 File the nail to the desired shape.
- 8 Remove any filing residues with Nail Brush.
- 9 Apply Quick Shine for final shine.
- 10 Place in UV/LED Lamp for 1/2 minutes.

 Video

APPLICATION WITH DUAL FORM TIP

- 1 Prepare the nail.
- 2 Apply Adhesion Promoter.
- 3 Apply Bonder Plus.
- 4 Select the correct size of Tip Dual Form for each nail.
- 5 Using the Spatula pick Acrygel and apply it inside the Tip Dual Form.
- 6 Apply the gel in a thin layer to the desired length, modeling it with the Brush moistened with Acrygel Solution.
- 7 Place the Dual Form Tip on the nail with a light pressure.
- 8 Clean product excess from sides.
- 9 Place in UV/LED Lamp for 1/2 minutes.
- 10 Place the nail upside down in UV/LED Lamp for 30 seconds.
- 11 Gently lift the Dual Form Tip .
- 12 File the sides and the tip of the nails.

Once the Tip Dual Form is removed, the nail will be perfectly shiny and smooth. It is not necessary to apply the top coat.

COLOR APPLICATION

For color effect, after point 8 apply Gel Color or Gel Polish and finish with proper top coat (Quick Shine or Base&Top Coat).

Instructions Acrygel

EXTENSION WITH TIP

Prepare the nail, apply, cut and level the Tip. Follow the same steps used for the application on natural nails.

EXTENSION WITH FORM - FRENCH EFFECT (FRENCH REVERSE)

- ① Prepare the nail.
- ② Apply Adhesion Promoter.
- ③ Apply Bonder Plu.
- ④ Place the Nail Form.
- ⑤ Using the Spatula pick Acrygel and distribute it all over the nail to the point where the oval for smile line is desired, modeling it with the Brush moistened with Acrygel Solution.
- ⑥ Place in UV/LED Lamp for 1/2 minutes.
- ⑦ Pick Acrygel White and place on the oval for smile line, modeling it with the Brush moistened with Acrygel Solution.
- ⑧ Place in UV/LED Lamp for 1/2 minutes.
- ⑨ Pick Acrygel Clear and distribute it on all the nail, modeling it with the Brush moistened with Acrygel Solution to the desired shape
- ⑩ Place in UV/LED Lamp for 1/2 minutes.
- ⑪ Remove the Nail Form.
- ⑫ Place the nail upside down in UV/LED Lamp for 30 seconds.
- ⑬ Using a Lint Free Wipe clean the nail with Magic Cleanser.
- ⑭ File the nail to the desired shape.
- ⑮ Remove any filing residues with Nail Brush.
- ⑯ Apply Quick Shine for final shine.
- ⑰ Place in UV/LED Lamp for 1/2 minutes.

IMPORTANT INFORMATION

- Acrygel is a much thicker product than gel. For this reason it is necessary to use a Spatula, which is also useful to place the necessary quantity of Acrygel on the nail.
- Acrygel Solution is a special liquid necessary to moisten the brush during Acrygel modeling phase. If the bristles are not slightly moistened the brush will not flow on the product making the application difficult.
- The brush must be moistened only when necessary, it is recommended to unload liquid excess on a dry wipe before placing the brush on Acrygel.
