High product yield

Innovative formula

Amazing shine and duration

Easy removal

Lasts up to 3 weeks

Flat brush with special bristles

Long lasting perfect colors

**Special formula**

that protects and strengthens natural nails

## Products

### Primaries

#### GEL POLISH ULTRABOND

Non acid primer which promotes Gel Polish adhesion. Assures longer life of Gel Polish in case of weak nails.

8 ml code 21001

#### GEL POLISH BASE&TOP COAT

Semi-permanent clear polish with a perfect and lasting shine, up to 3 weeks. It has the dual function of Base and Top Coat.

8 ml code 21002

### Bases

#### GEL POLISH VITAMIN BASE

Special Base with Vitamin B5 and Vitamin E, it is particularly suitable for protecting and reinforcing thin or brittle natural nails. It promotes the growth of the natural nail ensuring optimal duration of the service.

8 ml code 21003

#### GEL POLISH FILLER BASE

Special filler base, useful in case of imperfections of the natural nail. Self-leveling formula, medium density, allows to correct the shape and length of the nail. Allows an easier removal.

8 ml code 21006

#### GEL POLISH COVER FILLER BASE

Delicately covering filler base, ideal to give structure and correct the natural nail shape. Useful also for a nude effect. Easy removal formula, ideal for all types of nails. Available in many colors.

## Top Coats

### GEL POLISH MATTE TOP COAT

Top Coat for a fantastic and trendy matte effect. To be used as the last step instead of Base&Top Coat for a matte silk final effect.

8 ml code 21004

### GEL POLISH PERFECT TOP COAT

Ultra-shiny top coat, scratch resistant, characterized by higher viscosity. Preserves colors from yellowing or fading over time. Easy removal formula.

8 ml cod. 21012

### GEL POLISH MIRROR TOP COAT

High gloss Top Coat with no tacky layer to be used as an alternative to Base & Top Coat. Ideal with Chrome Powders, indicated also for a quick mirror effect without the need of cleansing.

8 ml code 21007

## Magnetic

### GEL POLISH MAGNET CAT EYE

Gel Polishes with magnetic effect. They contain precious bright micro particles: for unique multidimensional decorations.

# Gel Polish

# Gel Polish

## Instructions Gel Polish

### STEP 1: NAIL PREPARATION

- ① Spray Hand Sanitizer on customer hands.
- ② Apply Cuticle Remover and push cuticles with Cuticle Pusher.
- ③ Give the nail the desired shape using Straight File.
- ④ Remove shine from the nail surface with Slim Buffer.
- ⑤ Using a Lint Free Wipe slightly wet with Magic Cleanser, clean dust residue from the nail surface.
- ⑥ OPTIONAL: Apply Ultrabond on the entire nail and let it dry for 20 seconds.

### STEP 3: COLOR APPLICATION

- ① Apply a very thin coat of colored Gel Polish over the entire nail without touching the cuticle. Cap the free edge. Remove excess of gel from the cuticle area with a Wood Stick.
- ② Cure in LED Lamp for 30/60 seconds or UV Lamp for 2/3 minutes.
- ③ Apply a second coat of colored Gel Polish. Remove excess of gel from the cuticle area with a Wood Stick.
- ④ Cure in LED Lamp for 30/60 seconds or UV Lamp for 2/3 minutes.

### GEL POLISH REMOVAL

- ① Spray Hand Sanitizer on customer hands.
- ② Using Straight File remove the shiny top layer of Gel Polish.
- ③ Soak the Nail Wraps with Gel Polish Remover and wrap them on the nails.

### STEP 2: BASE APPLICATION

- ① Apply a thin coat of Gel Polish Base&Top Coat or Vitamin Base over the entire nail without touching the cuticle. Cap the free edge. Remove excess of gel from the cuticle area with a Wood Stick.
- ② Cure in LED Lamp for 30/60 seconds or UV Lamp for 2/3 minutes.

### STEP 4: TOP COAT APPLICATION

- ① Apply a coat of GEL POLISH Base & Top Coat over the entire nail without touching the cuticle. Cap the free edge. Remove excess of gel from the cuticle area with a Wood Stick.
- ② Cure in LED Lamp for 30/60 seconds or UV Lamp for 2/3 minutes.
- ③ Using a Lint Free Wipe clean the nail with Magic Cleanser.
- ④ Apply Cuticle Oil with a light massage.

- ④ Wait about 10/15 minutes and remove the Nail Wraps.
- ⑤ Using Wood Stick take off any Gel Polish residue.
- ⑥ Smooth nail surface with Slim Buffer.

#### **Recommendations**

*Gel Polish needs to be applied in thin coats, in particular when applying the base. It is important to seal well the free edge. After the application of the last layer of top coat it is necessary to remove the tacky layer. In order to prevent product hardening, place it away from light sources and always close well the bottle after use. In case of greasy nails or nails with particular problems, the use of Ultrabond is recommended to ensure longer lasting.*
